Subject: thank-you

Kris,

Thank-you for providing Ron and I an opportunity to provide input on Monday to the Lostine River Corridor draft detailed proposed action. The chance to provide constructive input to a specific and detailed proposal is what many of us - who had supported the earlier general concept - were waiting and hoping for... In retrospect, we should have written letters to that effect in the pre-scoping stage. In any event, thank-you.

I will be gone from the beginning of July to mid-August on my annual 6-week wilderness hike, so will have no email contact (not even at my resupply points). However, outside of those times if you or Clint would like someone to make editing suggestions on some forthcoming document, I promise that I will treat it with full confidentiality (communicate with absolutely no one; I would be happy to sign a confidentiality agreement) and with a neutral eye (not trying to sway the FS position one way or another; I only wish to help make the message more readily understandable to the common person). I propose that I would come into the FS office to read and make editing suggestions either verbally or in hand-writing. I understand if this is not something you wish to do, but I thought I would offer it.

Sincerely, fred
